## **Vision Problems in Ohio**

#### The Prevalence and Cost of Vision Problems

**Half of all blindness is preventable**, but the number of Ohioans who suffer vision loss continues to increase. Because of the growth in the aging population, in 2020 there were 1,729,883 Ohioans affected by vision-robbing conditions. The primary causes are diabetic retinopathy, cataract, glaucoma and age-related macular degeneration (AMD).

Vision disability is one of the top 10 disabilities among adults 18 years and older, one of the most prevalent disabling conditions among children, and causes a substantial social and economic toll for millions of people including significant suffering, disability, loss of productivity, and diminished quality of life. <sup>1</sup>

<sup>1</sup>Centers for Disease Control and Prevention. (2020, June 9). Fast Facts of Common Eye Disorders. <a href="https://www.cdc.gov/visionhealth/basics/ced/fastfacts.htm">https://www.cdc.gov/visionhealth/basics/ced/fastfacts.htm</a>

#### The Growth of Vision Loss in Ohio

Statistics from the 2020 Vision Problems in Ohio report indicate increases in the four leading causes of vision loss in Ohio since the 2014 report was issued.

- 97,870 people age 50 and older have age-related macular degeneration, a 10.5% increase
- ♦ 1,025,422 people age 40 and older have cataract, a 3.4% increase
- ♦ 294,742 people age 40 and older have diabetic retinopathy, a 3.5% increase
- ▶ 109,556 people age 40 and older have glaucoma, a 3.5% increase

#### **Economic Impact of Vision Problems in Ohio**

The estimated financial burden to the Ohio economy due to vision problems, refractive errors, visual impairment, and blindness for all age groups is \$6.1 billion annually. Direct costs of approximately \$2.9 billion include diagnosed disorders, medical vision aids, undiagnosed vision loss, aids/devices, education/school screening, and assistance programs. Indirect costs of approximately \$3.2 billion include productivity loss, informal care, long-term care, entitlement programs, tax deduction, and transfer deadweight loss (loss of economic efficiency when the optimal level of supply and demand are not achieved).

#### **How to Use Vision Problems in Ohio 2020**

VPOH 2020 is provided as an Ohio evidence-based resource for individuals and organizations to understand the scope and cost of vision problems to help guide health policy development/evaluation, target high risk populations, direct resources, and assist in community-based health services planning and implementation.

# **Vision Problems in Lorain County**

Total Population<sup>5</sup>: 309,833

1500 W. Third Ave., Suite 200 Columbus, Ohio 43212 1-800-301-2020 www.pbohio.org **Vision Problems in Ohio 2020** provides the evidence that vision disorders and impairment are major public health problems for Ohio. This county-specific data helps those caring for the visual health and well-being of Ohioans at the community level to understand the scope and cost of vision problems to establish sound policies and interventions that can help Ohioans enjoy good sight for life

Without early detection of eye diseases in children, families and older adults, Ohioans suffer from critical impact on their quality of life and ability to maintain independence.

Healthy vision has a critical role in every child's physical, cognitive and social development. An untreated eye condition like amblyopia (lazy eye) can lead to irreversible vision loss.

Gradual vision loss in older adults compromises their ability to conduct daily activities such as driving, walking, cooking, bathing and reading, thus reducing their independence. Glaucoma and diabetic retinopathy often produce no symptoms, and if left undetected and untreated, can lead to blindness.

Early detection of vision problems and uniform systems of accessible eye care for all Ohioans are critical components of an equitable health system that will lead to improvements in learning, socialization, job productivity, independence and quality of life.

### Prevalence of Age-Related Eye Disease in Lorain County<sup>1-2</sup>

Eye Dieseases	Total	Male	Female	White	Black	Other	Hispanic
Hyperopia: Age 40+	16,940	6,797	10,142	16,524	582	285	672
Myopia: Age 40+	40,540	18,572	21,968	38,976	1,562	861	1,951
Age-related Macular Degeneration: Age 50+	2,749	956	1,793	2,731	74	24	61
Cataract: Age 40+	28,730	11,344	17,385	27,134	1,524	505	1,216
Diabetic Retinopathy: Age 40+	8,263	3,902	4,361	7,352	608	188	851
Glaucoma: Age 40+	3,069	1,191	1,879	2,495	396	83	155
Blindness: Age 40+	1,068	420	647	956	97	15	44
Visual Impairment: Age 40+	4,600	1,818	2,782	4,047	379	118	344
Total Cases	105,958						

### The Economic Impact of Vision Problems in Lorain County Totals \$161,660,354<sup>3-4</sup>

	Ages 0-17	Ages 18-39	Ages 40-64	Age 65+	All Ages
Population <sup>5</sup>	67,544	80,468	103,625	58,196	309,833
Direct Costs*	\$5,484,588	\$8,758,508	\$26,905,063	\$39,161,155	\$77,317,771
Indirect Costs**	\$707,689	\$12,596,735	\$13,950,483	\$60,618,004	\$84,342,583
Total Costs	\$6,192,277	\$21,355,243	\$40,855,547	\$99,779,160	\$161,660,354

- \*Direct costs include diagnosed disorders, medical vision aids, undiagnosed vision loss, aids/ devices, education/school screening, and assistance programs.
- \*\*Indirect costs include productivity loss, informal care, long-term care, entitlement programs, tax deduction and transfer costs.

#### Age-Related Macular Degeneration

Central vision and color perception loss, distorted or fuzzy vision, difficulty with reading or facial recognition. Leading cause of vision loss for people 65 and older.

© Prevent Blindness, Ohio Affiliate 2021

# **Common Eye Diseases**

Side vision loss, tunnel vision, blurred central vision, seeing colored rings on lights. More common after age 40.

Cataract
Blurry, hazy, multiple images,
glare sensitivity, color perception loss, decreased night or low
-light vision. More common after
age 55.

#### **Diabetic Retinopathy**

Patches of vision loss (floaters or blind spots), cloudy vision, glare sensitivity, decreased night or low-light vision. 40% of individuals with diabetes have diabetes-related retinopathy.
